

DIGITAL SIGNAGE

Freshwater Digital is a digital signage and media production agency. Our networks are successful and effective because we take the time to understand your strategy, offer insights to your needs, and provide the best solution by partnering with both you and our industry suppliers. It's a real turn-key solution, as they say.

Freshwater Digital is technology focused, creates custom content, and manages networks like a boss. You are the actual boss of your content though, so let's show you some of the things you can do!

Bring your messages to life.

Digital signage is everywhere – retail stores, restaurants, schools, car dealerships, corporate offices, and more. A digital signage network can deliver relevant information at the right time to your guests.

Here is a list of cool uses for digital signage:

- Menu boards
- Welcome messaging for visiting clients
- Real-time local information, like weather and traffic
- Work anniversary and birthday shout-outs for employees
- Upcoming company events
- Touch screen experiences for learning about products or services
- Wayfinding through a building
- Animated artwork to enhance your atmosphere
- Important regulatory messaging or notices
